Food Allergen Information

(X) Contains allergen

Peanuts and tree nuts are not used in Gambino's Pizza restaurants but may be used in common manufacturing plants.

Some products are prepared in common equipment and therefore may contain allergen or ingredients of concern.

The allergen information provided is based on standard product formulations and is current as of January 2024. Variations may occur due to differences in suppliers, ingredient substitutions, recipe revisions, and/or product production at the restaurant. Some menu items may not be available at all restaurants. Limited time offers, test products, or regional items have not been included.

Our Restaurants prepare and serve products that may contain egg, milk, soy, wheat or other allergens. While a particular ingredient may not contain one of these allergens, our products may be prepared on the same equipment and in the same kitchen area as those that do. We cannot guarantee that cross contact with allergens will not occur and neither Gambino's Pizza, our employees, or our franchisees assume any responsibility for a person's sensitivity or allergy to any food item provided in our restaurants. If you have a food allergy, please consult with your healthcare practitioner about which Gambino's Pizza products are right for you.
